The doctor of the future will give no medicine, but will instruct his patient in the care of the human frame, in diet, and in the cause and prevention of disease.

Thomas Edison, 1902

WHO IS DR. KLEPZIG?

Dr Klepzig is a board certified and licensed acupuncturist, board certified and licensed chiropractic physician, certified herbalist, whole food nutritionist and practices homeopathy and functional endocrinology (hormone assessment and treatment).

All parts of the body function as a “whole” unit.

WHAT DOES DR. KLEPZIG DO?

If an organ or tissue is dysfunctional it will have an impact on all other organs and tissues. As a holistic

practitioner I utilize all the standard diagnostic tools such as blood tests, urine tests, MRI, X-Ray, etc when necessary. I also utilize functional medicine testing such as saliva and hair analysis when necessary.

The technique I utilize the most is Kinesiology or muscle testing. When muscle testing, I use acupuncture points (energy circuits) to assess your body's systems. Your body is a collection of different energy forms: chemical, electrical and photon (light emissions). Muscle testing allows me to access the information contained in the different energy forms. This technique is a sophisticated, analytical tool that takes years to master and use correctly.

There is no single system of healthcare that has all the answers. I have been fortunate enough to study many different systems of healing. My goal is to take what I consider to be the best of each system and create a system that works well for you. I am always updating and perfecting my techniques because we all are always evolving.

Acupuncture is best for rebuilding your *qi* or vital energy.

ACUPUNCTURE

Acupuncture is known for its ability to help manage pain. Though useful, the best utilization of acupuncture is for rebuilding your *qi* (vital energy). The Yin

and Yang polarities are one way to describe your autonomic nervous system divisions of Sympathetic and Parasympathetic activity. This part of the nervous system controls the functions of internal organs and is connected to acupuncture points on the skin. Therefore, acupuncture points can be used to treat any type of health condition anywhere in the body. Acupuncture points can also be used to perform a functional health assessment of the internal organs and tissues. This type of assessment is known as muscle testing or kinesiology.

The human body heals & maintains itself with the food we eat.

WHOLE FOOD NUTRITION

Poor quality food choices lead to illness and disease. Obtaining all your nutritional needs from your diet is preferred but nearly

impossible to accomplish when we are trying to recover your health from illness or disease.

I prescribe specific whole food supplement protocols for most patients because most chronic illness involves compromised healing mechanisms that must be treated with a concentrated food source.

It is estimated that 80% of the world population utilizes herbal therapy.

HERBAL MEDICINE

There is archeological evidence of humans utilizing plants as medicine as long as sixty thousand years ago and written records dating back five thousand years.

As a certified herbalist

I know that herbal medicine used properly can produce significant changes in a health condition in a relatively short period of time. Herbal products can vary widely in quality because some companies use low quality herbs or the herbs are improperly processed and do not capture all the healing qualities of the original plant material. In Australia, herbal medicine is regulated and the quality of the products is guaranteed. I utilize Mediherb herbal products of Australia in my clinics.

Health is a verb
